

GOODS RECEIVED

The KDS Goods Received routines afford full and transparent control over the receipt and movement of goods inwards.

Booking In Stock

It is essential to the success of any distribution operation that goods received from suppliers match what has been ordered in terms of price, quantity and compliance to internal controls.

Enter standard receipts against purchase orders, or partial receipts with the outstanding quantity marked *to follow*. If required, allocate stock to existing back orders before making it available for general release. For products subject to weights and measures, record the details on receipt to ensure they fall within acceptable tolerances. For products subject to batch control, record the batch identifier, together with an optional batch expiry date for automatic FIFO/LIFO processing. In the food industry, Goods Received is one of a set of integrated modules that enables you to maintain records that fully comply with EEC regulations on batch traceability.

Occ	Lno	Description	Qty Rec	Qty Del	C/Price	BC
1	1	BEATLES 1967-1970 (BLUE ALBUM) 2CD	4	0	19.980	0
2	2	AL GREEN GREATEST HITS	5	0	9.490	0
3	3	TEXAS WHITE ON BLONDE	5	0	9.990	0
4	4	BLACK UHLFUJ LIBERATION 2CD	1	0	10.250	0
5	5	HUSKER DU CANDY APPLE GREY	1	0	8.660	0
6	6	ORANGE JUICE VERY BEST OF	2	0	8.950	0

Booking in Stock

Products that are not delivered into stock can nevertheless be made available to customers by raising orders for delivery direct from supplier to customer. Use the special routines to match direct deliveries against purchase orders to ensure that all such movements are accounted for.

Similarly, goods received from other depots via interbranch transfers can be booked into the receiving warehouse using dedicated routines. The system will then produce the relevant paperwork for invoices or credit notes.

On successful booking in, goods received notes are raised automatically and passed to the KDS Invoice Reconciliation routines, ready for matching against the supplier invoice based on pre-specified price and quantity tolerances.

Stock Putaway

KDS Goods Received provides the flexibility needed to reflect individual warehouse operations. Configure each warehouse so that receipts are either booked into the picking area or directly into the bulk stores. If received directly into bulk, further flexibility allows for interactive operator selection of a suitable free fixture, or automatic system selection based on information prerecorded against the product and location environment. Movement dockets are triggered automatically. Generate pallet and shelf/bin labels if required.

Flag stock which, for any reason, is unsuitable for selling as *isolation stock*, and adjust stock records accordingly. Use the stock adjustment routines at any time to make further adjustments to the stock records, for example following stock take. Perpetual inventory is fully supported by KDS and counts can be carried out by count group, product group, area or supplier.

Warehouse Integration

Reduce administrative costs, achieve greater productivity and maintain accurate real-time stock records by taking advantage of standard KDS integration into sophisticated warehouse technologies such as radio data terminals, voice recognition software and automated conveyor systems.

Analysis and Monitoring

Maintain records of the average delivered cost of stock and track all stock movements simply and effectively - including goods received, isolated stock and stock adjustments – by making use of the full audit trail facilities available.

Keep abreast of your stock situation on a daily basis, flagging stock levels, stock valuation, stock outages, products below minimum stock, slow and fast moving stock, excess stock, weekly stock cover, back-ordered and forward-ordered stock, and held stock.

Key Features

- Record full or partial receipts
- Match receipts to purchase orders
- Supports batch control, weight control and FIFO/LIFO
- Fulfils EEC regulations pertaining to batch traceability within the food industry
- Account for stock delivered directly from supplier to customer
- Stock isolation and stock adjustments
- Allocate stock to back orders
